Main Features

Capacitive Touchscreen- 24-bit true colour digital touchscreen, fast responsive and vibrant colour display.

Octa-core processor- the brain of the head unit. Super-fast and optimised for highly demanding tasks

Android Auto- Full access to Android Auto via Speedplay. Can be wired (USB) or Wireless.

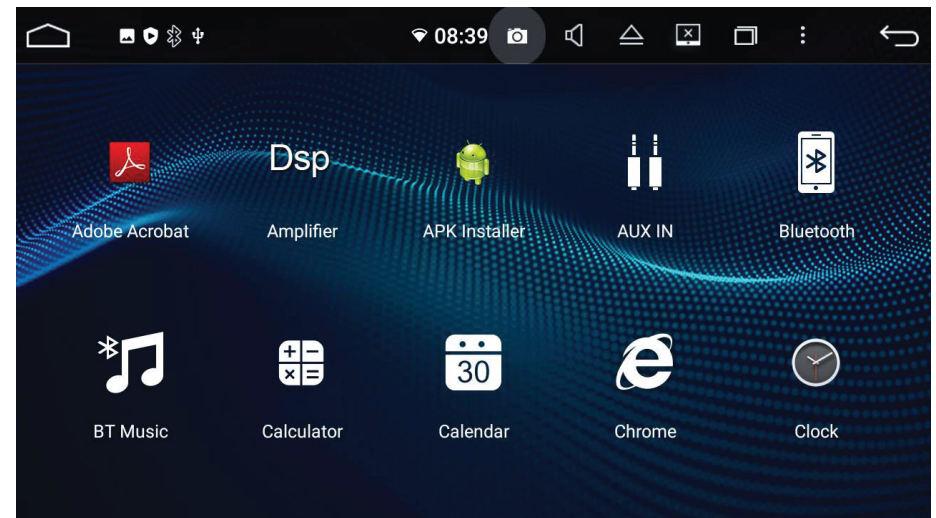

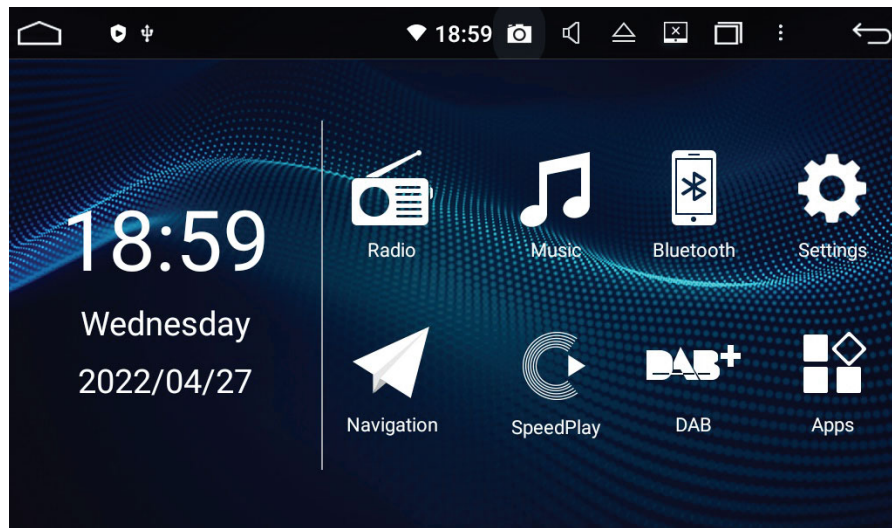

Apple Car Play- Full access to Apple Car Play- via Speedplay. Can be wired (USB) or Wireless.

Built in Navigation - Navigate in over 50 countries with the inbuilt Navigation

Main Homepage

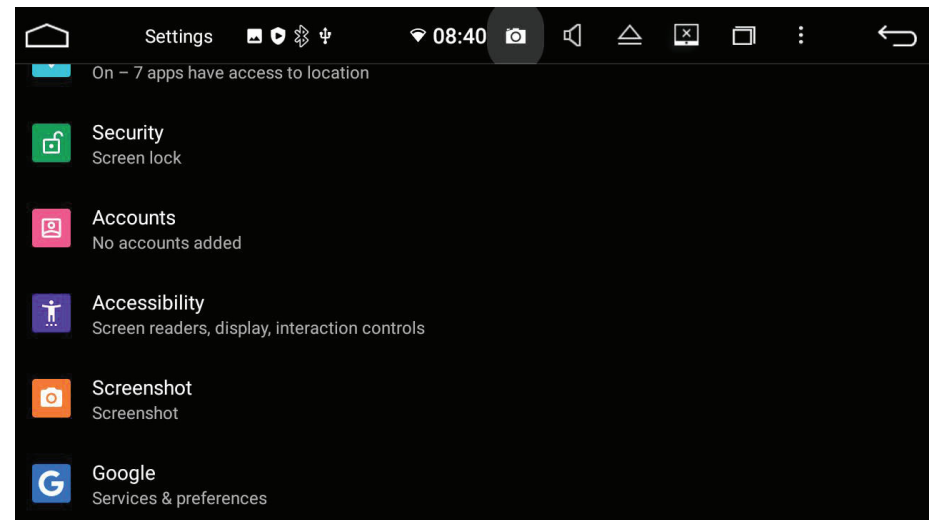

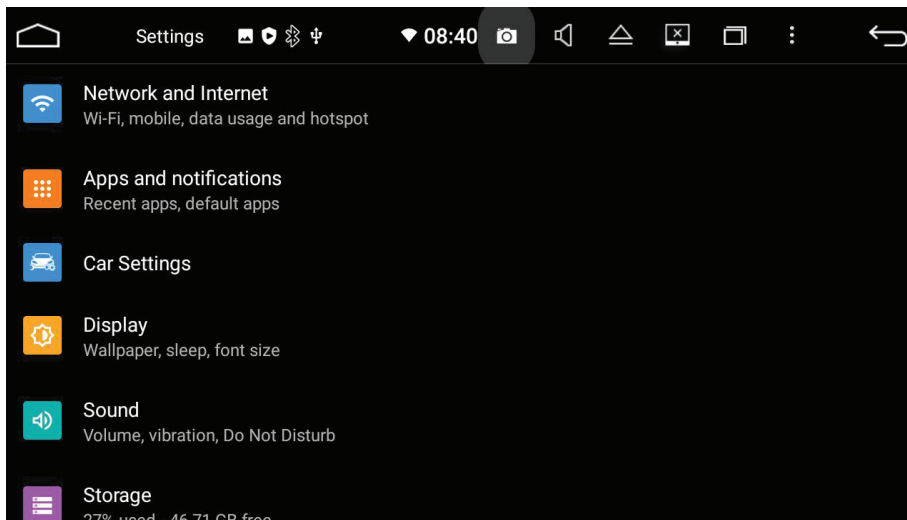

When you power on the headunit, it will enter a main interface. The interface can slide left or right. Please select the icon to enter relevant function for operation. Please note, the stereo may go through graphical design changes in the layout without notice. Whereas function will be kept, icons may be different as 3rd party app developers update their respective apps.

System Settings ¹

In most applications, the default settings are OK to use as is. The below are the main system settings you can configure.

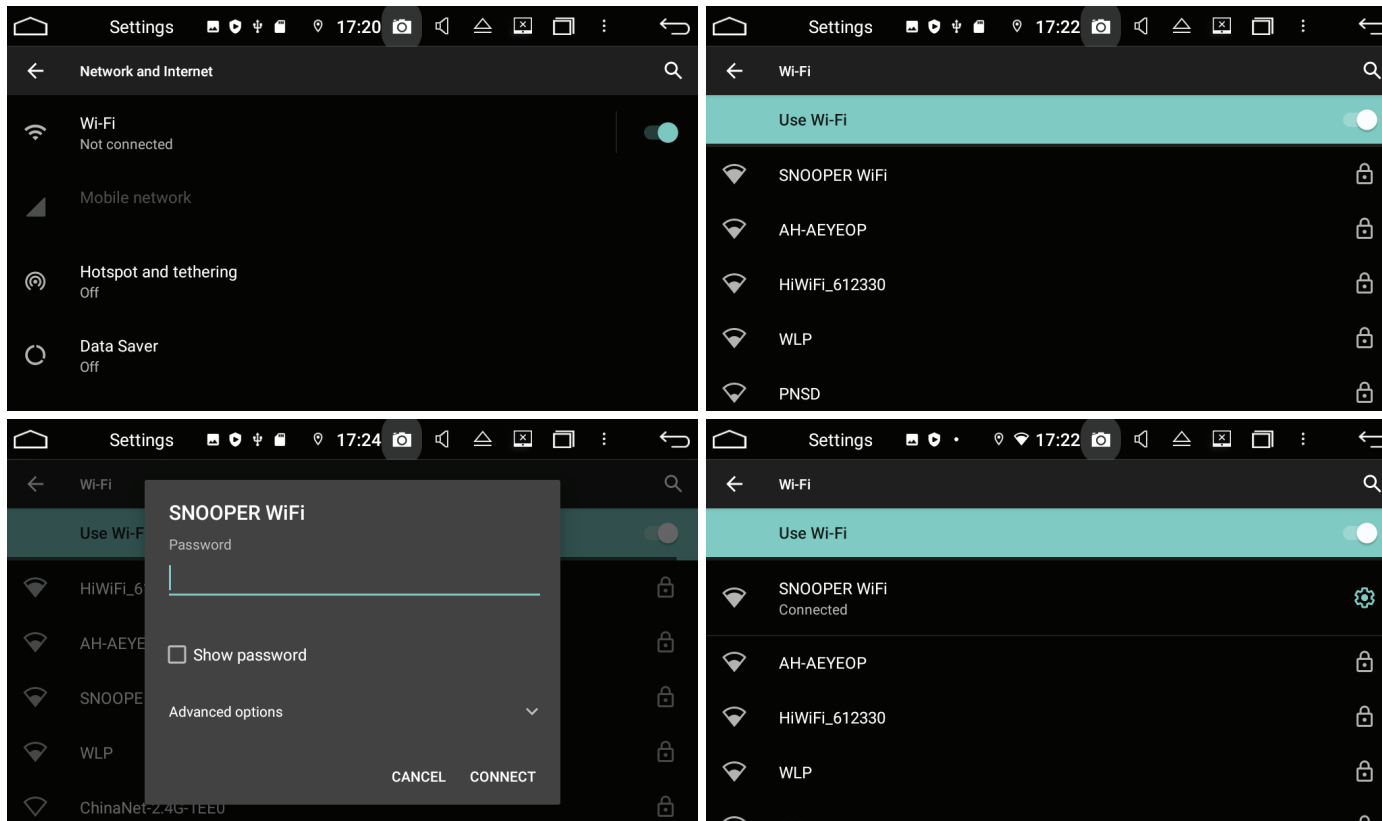

Press the setting icon (⚙️) to enter the main settings interface. It will look like the below pictures:

System Settings²

WiFi Settings:

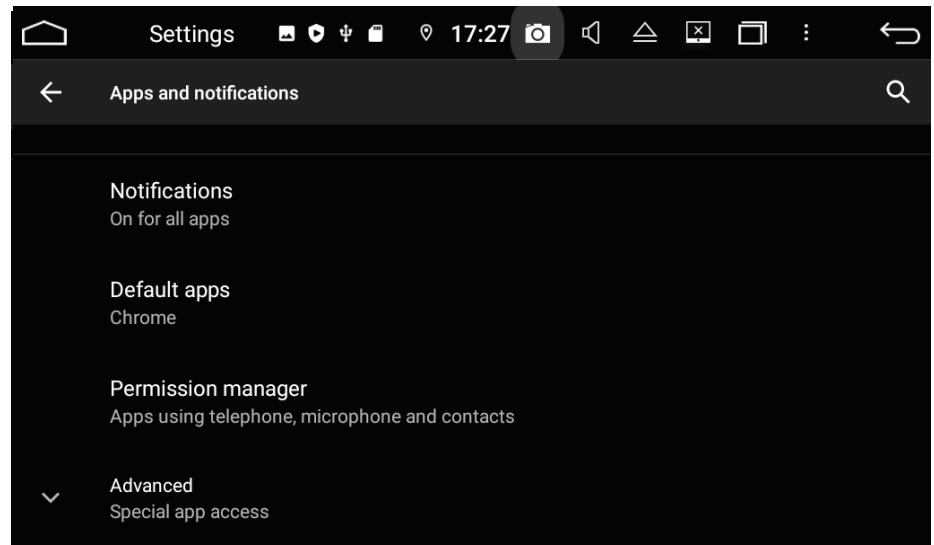

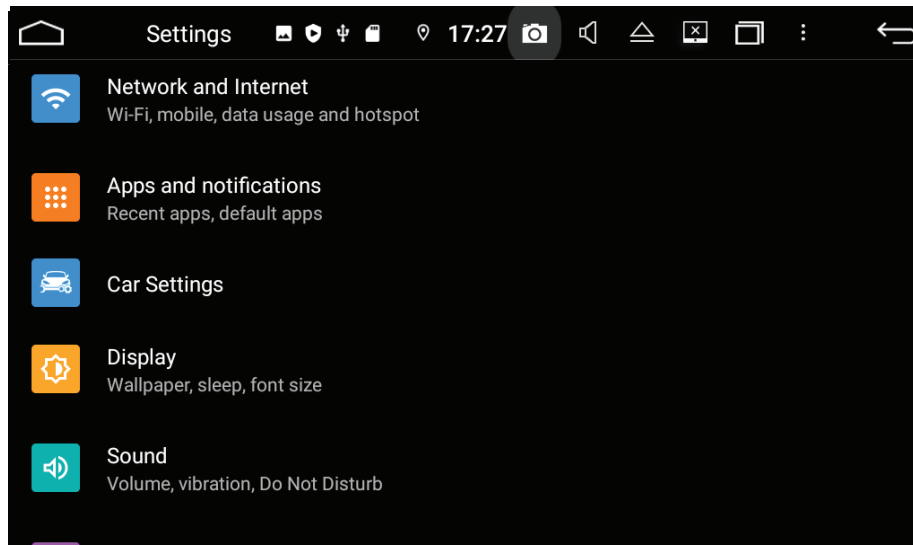

Press "Network and Internet" > Switch WiFi on > Press WiFi to show available networks > select network you wish to connect to (you will have to enter a network password)> When successful, WiFi Icon will show at the top

System Settings³

Apps and Notifications:

Select "Configure App notifications" > Select notifications > Select the app you wish to configure
Select "Configure App notifications" > "Select Permission Manager" > Select the app you wish to configure

Car Settings:

Configure Personal settings, default navigation app, driving settings.
Enter car settings > Select the feature you want to configure

System Settings ⁴

Display:

Adjust brightness levels, wallpapers and font size.

Sound:

Adjust System volume and touch sounds.

Storage:

Check current storage status and free up space if needed.

Location:

Change location settings and permissions.

Security:

Set passwords and screen lock type.

Accounts:

Add Google account for App and email sync. ***Not recommended if the vehicle is shared.***

System Settings ⁵

Accessibility:

Configure your accessibility needs with this setting. For example, colour correction, text to speech, font size and magnification.

Google:

Configure your google preferences and services via this setting. *(it will open a new window)*

System:

Adjust Date and time, languages, factory reset and backup.

About Machine:

System updates, Status, Legal information, Model number, Android version, Baseband version, Kernal Version and Build number

System Settings⁶

This Snooper stereo has a fully customisable audio output. Please follow the below steps to access the amplifier settings.

Enter the **"amplifier"** app on the apps menu > Enter the setting you want to (choose from special effects, sound field, settings, sound effects, EQ and balance controls) > Adjust said setting to required taste.

Please Note: These settings will ideally need to be set by an experienced car audio installer. If you are fitting this as a DIY install or have little to no experience with audio tuning, please use the presets on the menu.

Audiophiles...have fun!

Radio Functions & Operation ¹

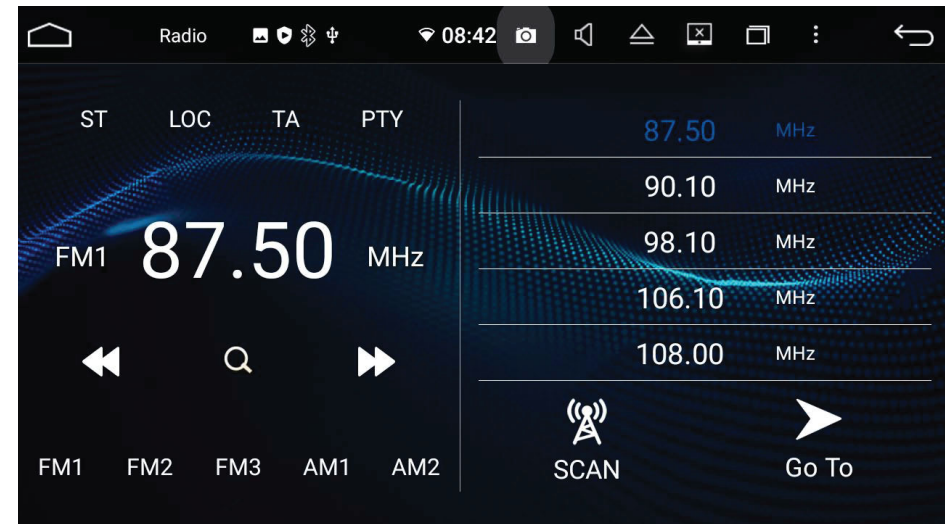

To play the radio, adjust station and scan, it is very simple.

To Scan:

Adjust brightness levels, wallpapers & font size.

To Select Station:

Short press the **"Radio"** button on the home screen > press the desired radio frequency.

Manual Station Search:

Short press the **"Radio"** button on the home screen > Press the left/right arrow to manually search for radio stations.

Auto Search:

Short press the **"Radio"** button on the home screen > press the magnifying glass to search (lowest frequency to highest) and press again to stop searching.

Radio Operation ²

Radio Station Presets:

Each wave band can store 6 pre-set stations. The system can totally store 24 pre-set station total (18 FM station and 6 AM station).

Stereo/Mono Conversion:

FM radio signals are generally stronger in cities, so keep in stereo mode. When in remote areas, stereo is weaker so switch over to Mono.

Short press the ***"Radio"*** button on the home screen > Press ***"ST"*** for desired mode.

Local Radio Receiver:

FM radio signals are generally stronger in cities, so keep in stereo mode for LOC. When in remote areas, stereo is weaker for LOC mode so switch over to Mono. This headunit can switch automatically between

Short press the ***"Radio"*** button on the home screen > Press ***"LOC"*** for desired mode.

DVD Player - Basic Operation *(SMH-620DAB & SMH-580VW Only)*

Quick Tips:

If playback issue occurs, please remove the disc, and try another disc. If the other disc plays, you may have format incompatibility issues. If both discs fail, both may be in the wrong format.

Disc Entry/Exit

Take the disc (label side up), then softly insert the disc into disc slot. The system will draw and read the disc automatically after it detects the disc has been correctly inserted. After few seconds, the system will play the disc automatically. Press the Exit key on panel of the product to eject the disc from the disc drive. If the disc is not removed in five seconds, the system will try to eject the disc but will not automatically play the disc. Only by pressing the  key and re-inserting the disc into disc slot, the system will automatically play the disc.

DVD Player - Basic Operation

Playing/Pause:

In the state of playing the disc, USB media or SD card, softly press the ►|| key at the bottom of media control interface to pause playing or continue playing.

Chapter Selection:

In the state of playing the disc, USB disc or SD card, softly press the ◀▶ keys to play the previous or next chapter of current-playing chapter.

High-speed Fast Forward/Fast Backward control:

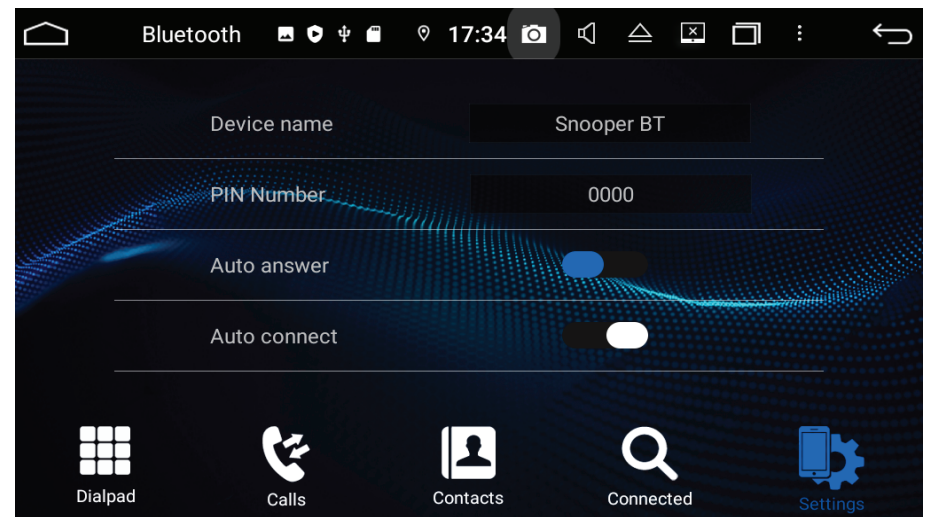

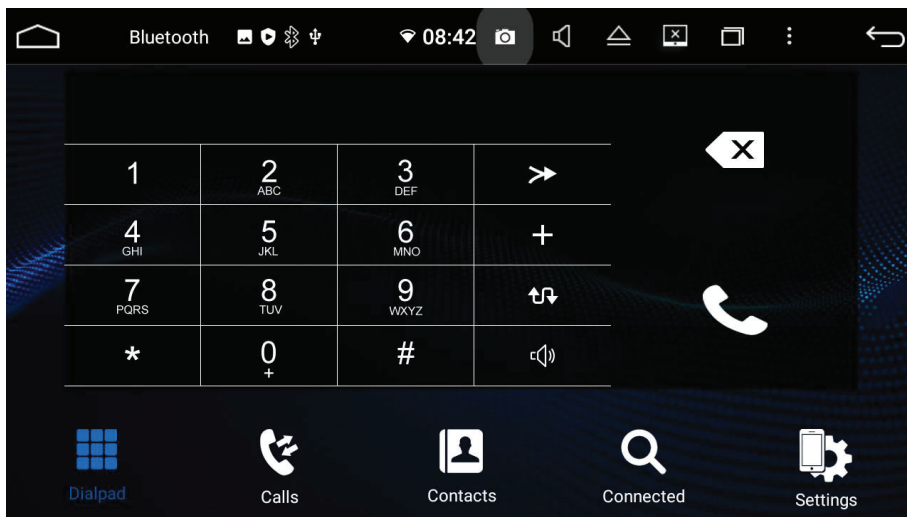

When the media is playing, long press ►| key at the bottom of media control interface continuously to enter fast rewind x2 / fast rewindx4 / fast rewindx8 / fast rewind x20

In the state of fast rewind playing, press key to resume to normal playing state. Softly press the ►|| key of media playing control interface to enter & run next chapter, subtitle switch, language switch, or repeat of current chapter.

Bluetooth Hands - Free Operation ¹

Bluetooth Paring and Connection:

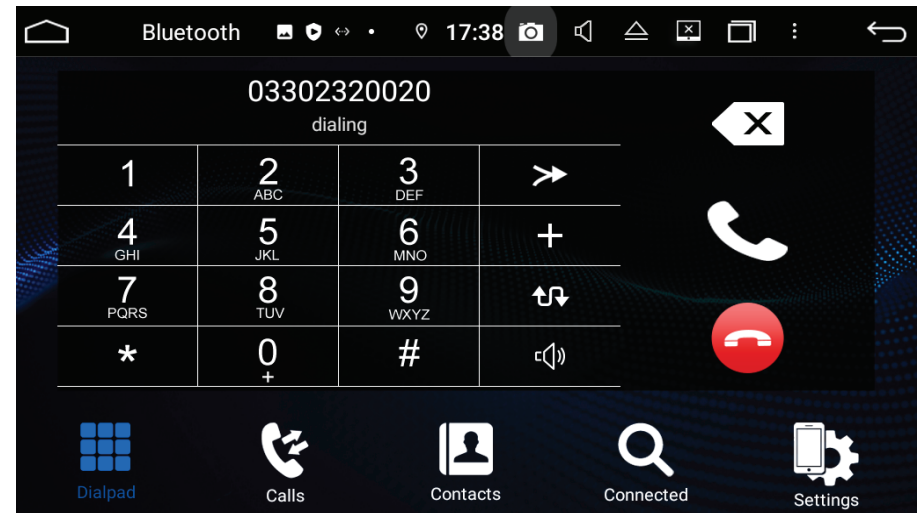

Turn on the Bluetooth function of the mobile phone> Search for the stereo on the Bluetooth settings on the phone> It should show "Snooper BT" (if detecting the stereo)> When connecting with mobile phone, input the universal code "0000" and confirm it > After the mobile phone has been paired and connected with the product successfully, the Bluetooth icon will appear on the top of interface

Bluetooth Hands - Free Operation ²

Dialing:

After the Bluetooth hands-free system connects with mobile phone's Bluetooth, you can dial directly by phone or touch screen's number keys. Pressing key on Bluetooth interface can enter the dialling interface too, as below picture

Receive / Hang up / Stop Phone:

For receiving an incoming call, the system will switch to Bluetooth hands-free interface from any other mode, meanwhile, the playing sound of previous mode will switch to ring tone of incoming call, and the phone number will display on the screen, Press the  on touch screen to receive phone.
